COMPANY PROFILE

A practical construction partner for modern infrastructure needs.

Corelux Infra Private Limited is a growing infrastructure and construction company delivering civil, commercial, residential and industrial project work with a strong focus on quality, safety and timely execution.

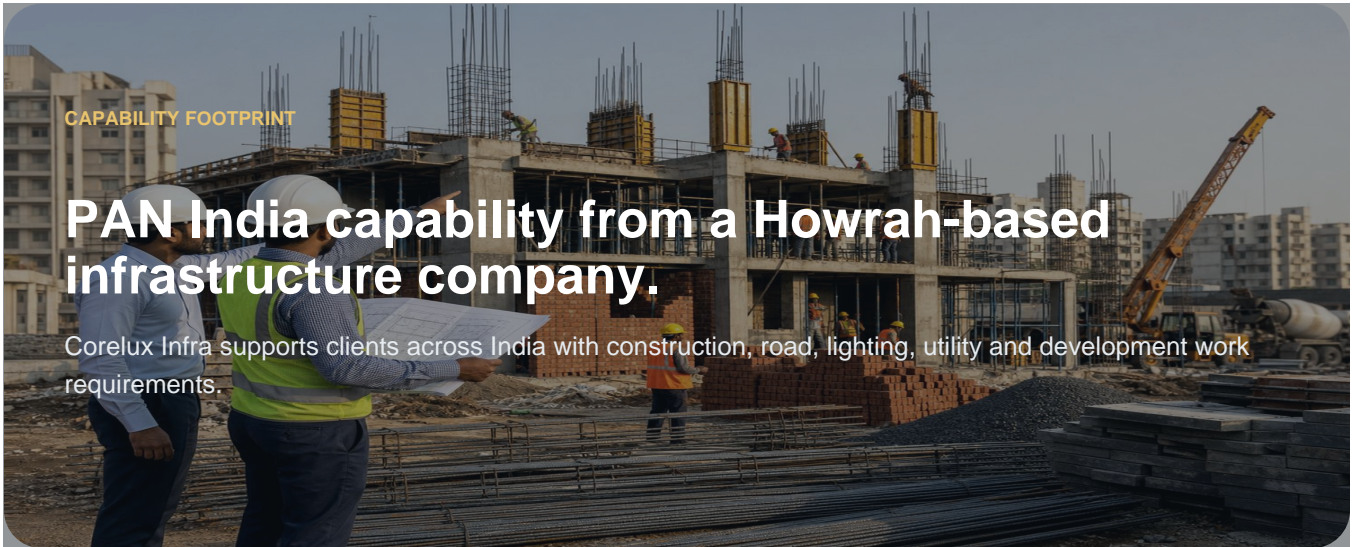

Corelux Infra Private Limited is a growing infrastructure and construction company delivering civil, commercial, residential and industrial project work with a strong focus on quality, safety and timely execution.

Scope Highlights

A practical construction partner for modern infrastructure needs.

- Civil, commercial, residential and industrial works
- Roads, utilities, lighting and structural work
- Reliable communication from enquiry to handover
- Cost-conscious execution planning

CAPABILITY FOOTPRINT

PAN India capability from a Howrah-based infrastructure company.

Corelux Infra supports clients across India with construction, road, lighting, utility and development work requirements.

Corelux Infra supports clients across India with construction, road, lighting, utility and development work requirements.

Scope Highlights

PAN India capability from a Howrah-based infrastructure company.

- Service coverage across India
- Government, private and commercial project readiness
- Scope-driven planning for each site
- Communication through email, call and WhatsApp

MISSION & LEADERSHIP

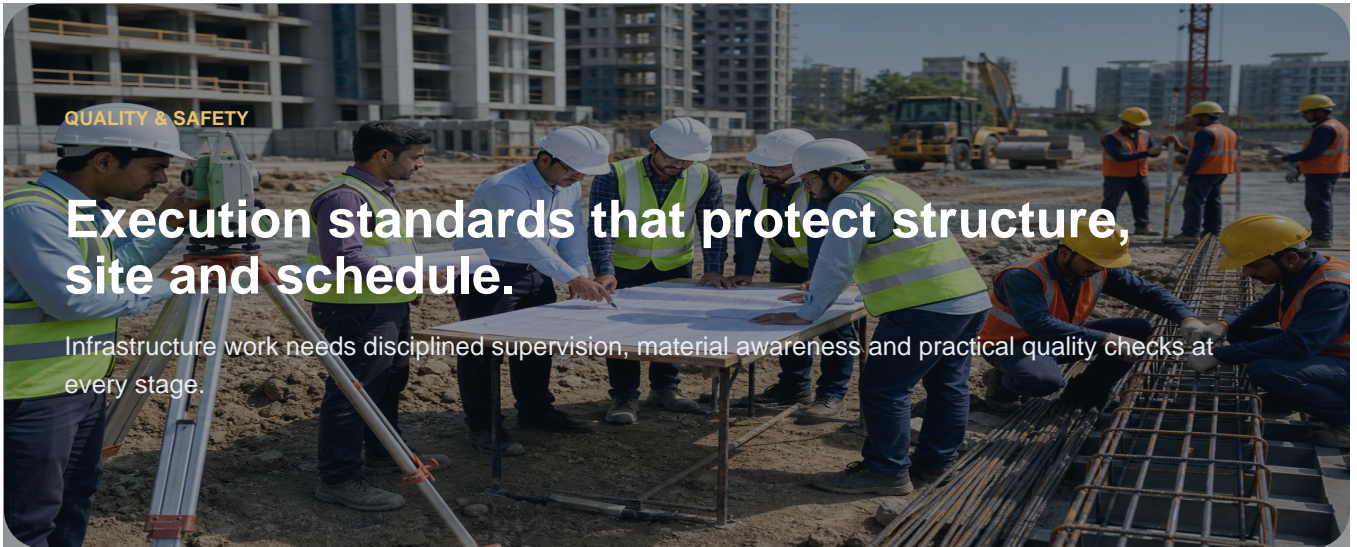

Built on quality, integrity and long-term trust.

“At Corelux Infra Private Limited, we believe that quality infrastructure is the foundation of sustainable growth. Our commitment is to deliver reliable, innovative and cost-effective solutions while maintaining the highest standards of safety, quality and integrity.”

Managing Director, Corelux Infra Pvt. Ltd.

“From roads and buildings to lighting and infrastructure development, our mission is simple: deliver excellence, create value and earn trust through every project we complete.”

Director, Corelux Infra Pvt. Ltd.

QUALITY & SAFETY

Execution standards that protect structure, site and schedule.

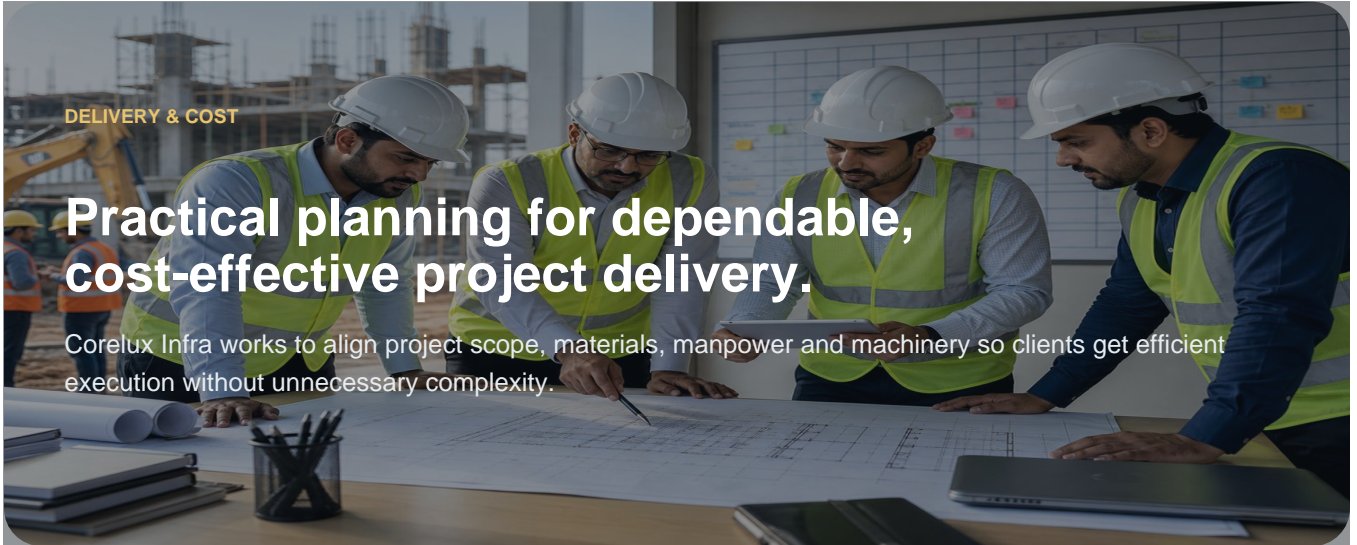

Infrastructure work needs disciplined supervision, material awareness and practical quality checks at every stage.

Infrastructure work needs disciplined supervision, material awareness and practical quality checks at every stage.

Scope Highlights

- Quality-focused construction and infrastructure execution
- Safety-aware site management
- Supervised manpower at active work locations
- Practical checks before progress handover

DELIVERY & COST

Practical planning for dependable, cost-effective project delivery.

Corelux Infra works to align project scope, materials, manpower and machinery so clients get efficient execution without unnecessary complexity.

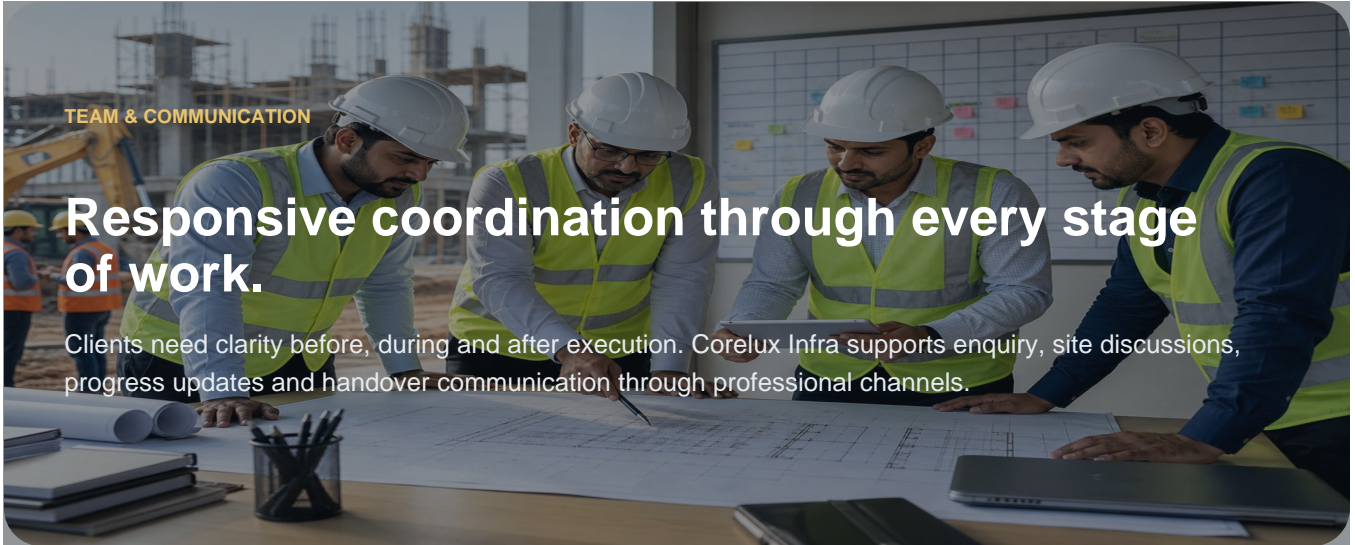

Practical planning for dependable, cost-effective project delivery.
Corelux Infra works to align project scope, materials, manpower and machinery so clients get efficient execution without unnecessary complexity.

Scope Highlights

Cost-effective project delivery.

- Clear scope understanding before execution
- Resource planning suited to each site
- Cost-effective construction solutions
- Progress-focused coordination

TEAM & COMMUNICATION

Responsive coordination through every stage of work.

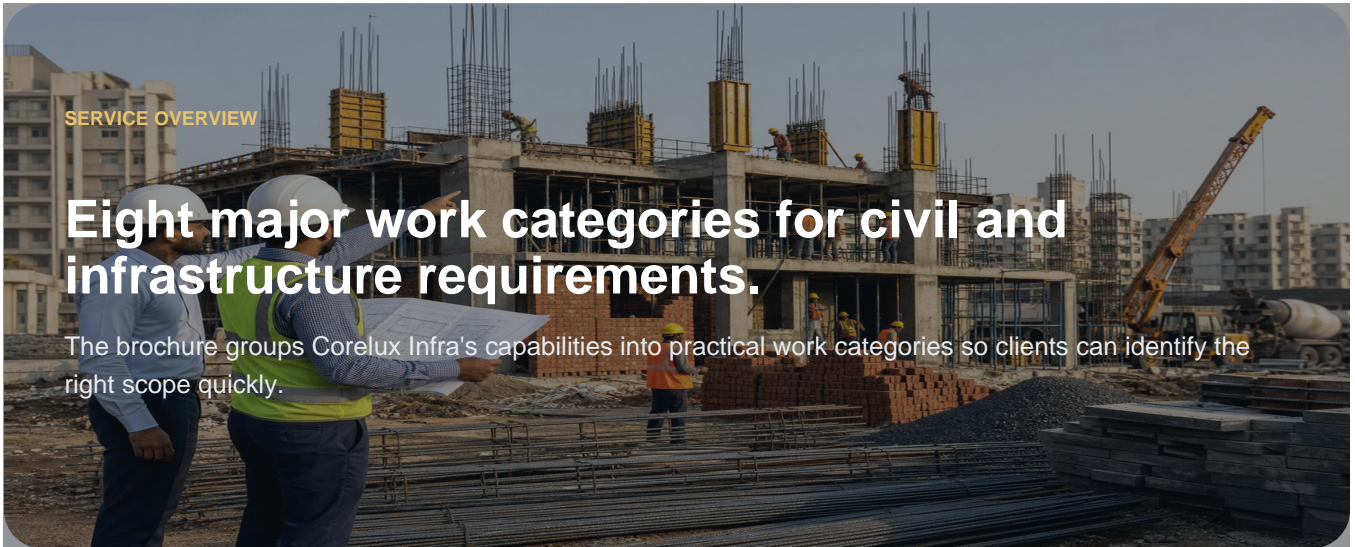

Clients need clarity before, during and after execution. Corelux Infra supports enquiry, site discussions, progress updates and handover communication through professional channels.

Clients need clarity before, during and after execution. Corelux Infra supports enquiry, site discussions, progress updates and handover communication through professional channels.

Scope Highlights

- Email, phone and WhatsApp enquiry routes
- Coordination between office and site teams
- Clear work updates for serious project enquiries
- Client-focused response process

The brochure groups Corelux Infra's capabilities into practical work categories so clients can identify the right scope quickly.

Scope Highlights

Eight major work categories for civil and infrastructure requirements.

- Civil construction works
- Road and infrastructure works
- Electrical and street lighting works
- Water and utility infrastructure
- Industrial, township, supply and turnkey services

CIVIL CONSTRUCTION

Residential & Commercial Buildings

Residential and commercial construction support for durable, functional building requirements.

Work Scope

- Residential building construction
- Commercial building construction
- RCC structural work
- Finishing-ready civil execution

CIVIL CONSTRUCTION

Industrial Buildings & Warehouses

Civil construction for industrial structures, factory facilities and warehouse environments.

Work Scope

- Industrial building construction
- Factory and warehouse construction
- Material handling and site coordination
- Structural planning support

CIVIL CONSTRUCTION

Toll Plaza & Farm House Construction

Specialized civil work for toll plaza support buildings and farm house construction requirements.

Work Scope

- Toll plaza building works
- Farm house construction
- Site-specific layout execution
- Practical RCC and masonry support

CIVIL CONSTRUCTION

Boundary Walls & RCC Foundations

Foundational and protective civil work for properties, project sites and infrastructure areas.

Work Scope

- Boundary wall construction
- Durable concrete work
- RCC structures and foundations
- Alignment and level coordination

CIVIL CONSTRUCTION

Earthwork & Paver Blocks

Site preparation, excavation and paving support for construction and development projects.

Work Scope

- Earthwork and excavation
- Paver block and interlocking work
- Base preparation
- Surface finishing support

ROAD INFRASTRUCTURE

PCC & CC Roads

Concrete road execution for rural, township, industrial and internal access requirements.

Work Scope

- PCC road construction
- CC road construction
- Sub-base and concrete placement
- Finishing and curing support

ROAD INFRASTRUCTURE

PMGSY & Township Roads

Road construction support for rural connectivity, internal township layouts and planned development.

Work Scope

- PMGSY road projects
- Internal township roads
- Drainage-aware planning
- Execution coordination for access roads

ROAD INFRASTRUCTURE

Asphalt & Widening

Bituminous surfaces and widening work for improved road capacity and movement.

Work Scope

- Bituminous / asphalt roads
- Road widening and improvement
- Surface preparation
- Traffic-sensitive execution planning

ROAD INFRASTRUCTURE

Culverts, Bridges & Drainage

Supporting road infrastructure through culverts, small bridges and storm water systems.

Work Scope

- Culverts and small bridges
- Drainage and storm water systems
- Water flow planning
- Concrete and utility integration

ROAD INFRASTRUCTURE

Road Marking & Sign Boards

Road visibility and traffic guidance support for completed and active road projects.

Work Scope

- Road marking with thermoplastic paint
- Lane and edge visibility
- Road sign board installation
- Traffic information support

ROAD INFRASTRUCTURE

Safety Barriers & Reflectors

Road safety additions that improve controlled movement and night-time visibility.

Work Scope

- Crash barriers / guard rails
- Reflectors and cat eyes installation
- Speed breakers
- Safety-oriented road finishing

ELECTRICAL & LIGHTING

Street Lights & High Mast

Lighting infrastructure for roads, commercial areas, industrial sites and public spaces.

Work Scope

- Street light installation
- Pole erection and alignment
- High mast lighting systems
- Site lighting support

ELECTRICAL & LIGHTING

Octagonal & Decorative Poles

Pole supply and installation work for functional and decorative lighting requirements.

Work Scope

- Octagonal pole supply and installation
- Decorative pole installation
- Foundation coordination
- Alignment and finishing checks

ELECTRICAL & LIGHTING

LED & Solar Street Lights

Energy-conscious lighting work for modern outdoor and infrastructure environments.

Work Scope

- LED street light supply and installation
- Outdoor lighting planning
- Solar street light systems
- Long-life lighting solutions

ELECTRICAL & LIGHTING

Cabling & Earthing

Electrical groundwork for dependable power flow, safer installation and project readiness.

Work Scope

- Underground cable laying
- Earthing and electrical infrastructure
- Cable route planning
- Testing support

ELECTRICAL & LIGHTING

Feeder Pillar & Panels

Control panel and feeder pillar installation support for lighting and electrical infrastructure.

Work Scope

- Feeder pillar installation
- Control panel installation
- Electrical distribution support
- Site-ready commissioning checks

WATER & UTILITIES

Pipelines & HDPE/DI Works

Pipeline network execution for water supply and utility infrastructure requirements.

Work Scope

- Water supply pipeline network
- HDPE pipeline works
- DI pipeline works
- Trenching and laying coordination

WATER & UTILITIES

Borewell, Pump & Sewerage

Utility support for water access, pumping systems and sewerage networks.

Work Scope

- Borewell installation
- Pump installation
- Sewerage network
- Testing and connection support

WATER & UTILITIES

Rainwater Harvesting

Water conservation infrastructure for buildings, townships and development projects.

Work Scope

- Rain water harvesting systems
- Collection and recharge planning
- Civil and utility integration
- Sustainable site development support

INDUSTRIAL & STRUCTURAL

PEB & Industrial Sheds

Industrial structure support for pre-engineered buildings and shed construction.

Work Scope

- PEB - Pre-Engineered Building
- Industrial sheds
- Frame and roofing coordination
- Execution support for production spaces

INDUSTRIAL & STRUCTURAL

Steel & MS Fabrication

Fabrication support for structural steel, MS works and site-specific requirements.

Work Scope

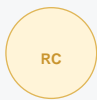

- Structural steel fabrication
- MS fabrication works
- Workshop and site support
- Measured fabrication planning

INDUSTRIAL & STRUCTURAL

Roofing & Cladding

External protection and finishing support for industrial and commercial structures.

Work Scope

- Roofing works
- Cladding works
- Weather-aware material planning
- Industrial finish support

TOWNSHIP & DEVELOPMENT

Township Development & Site Works

Integrated development support for township and large site environments.

Work Scope

- Township development
- Site development works
- Internal roads and utilities
- Coordinated infrastructure planning

TOWNSHIP & DEVELOPMENT

Landscaping & Parks

Outdoor development work that improves usability, appearance and community value.

Work Scope

- Landscaping and horticulture
- Pathways and green areas
- Park development
- Finishing support for public spaces

TOWNSHIP & DEVELOPMENT

Sports Ground Development

Ground preparation and development support for active outdoor sports environments.

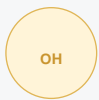

Work Scope

- Sports ground development
- Leveling and surface preparation
- Drainage-aware planning
- Utility and access support

SUPPLY & INSTALLATION

Octagonal & High Mast Poles

Supply and installation support for pole-based lighting infrastructure.

Work Scope

- Octagonal poles
- High mast poles
- Foundation and lifting coordination
- Site installation checks

SUPPLY & INSTALLATION

LED Lights & Foundation Bolts

Critical lighting and anchoring components for outdoor installation work.

Work Scope

- LED street lights
- Foundation bolts
- Lighting accessories
- Fitment and alignment support

SUPPLY & INSTALLATION

GI Brackets & Electrical Accessories

Installation materials and accessories used in lighting and electrical infrastructure.

Work Scope

- GI brackets
- Electrical accessories
- Earthing materials
- Material support for site teams

SPECIALIZED SERVICES

Turnkey & EPC Projects

End-to-end infrastructure execution support from planning to delivery.

Work Scope

- Turnkey infrastructure projects
- EPC projects
- Multi-service coordination
- Single-window project execution support

SPECIALIZED SERVICES

Tender, PM & Consultancy

Support for tender-linked execution, project planning and practical site coordination.

Work Scope

- Government tender execution
- Project management and consultancy
- Progress tracking
- Client coordination

SPECIALIZED SERVICES

Survey & Estimation

Practical field assessment and estimation support before execution starts.

Work Scope

- Survey support
- Estimation services
- Measurement review
- Scope and quantity planning

EXECUTION METHODOLOGY

Enquiry & Site Survey

Every serious project begins with understanding the site, requirement and intended outcome.

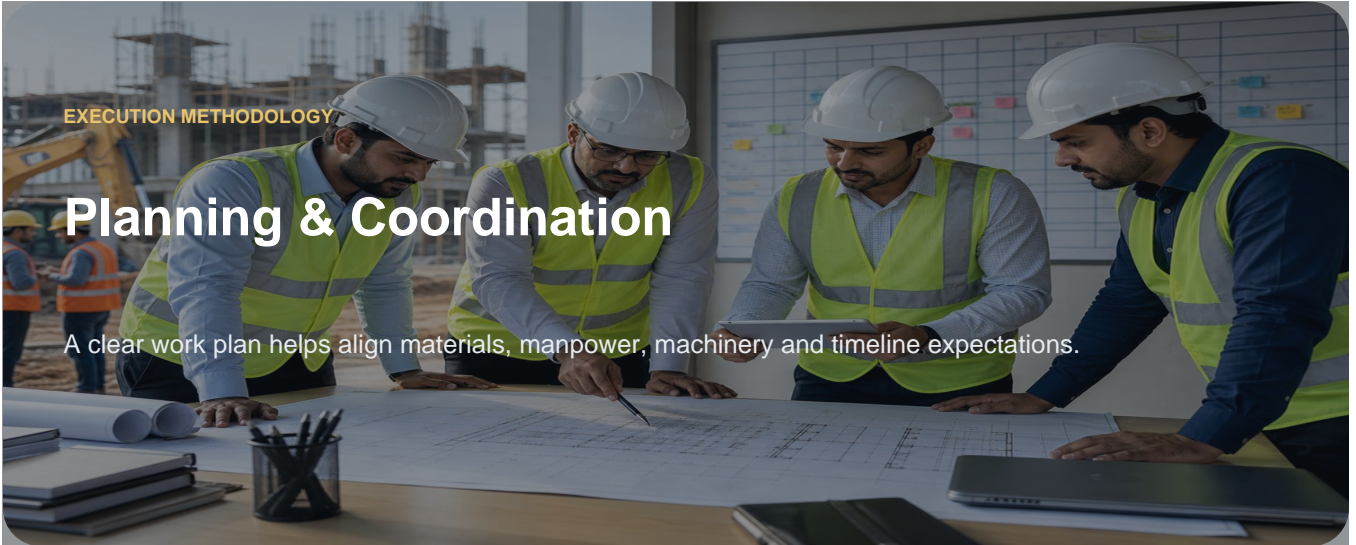

Enquiry & Site Survey

Every serious project begins with understanding the site, requirement and intended outcome.

Scope Highlights

- Client enquiry review
- Requirement understanding
- Site visit and condition study
- Preliminary feasibility notes

EXECUTION METHODOLOGY

Planning & Coordination

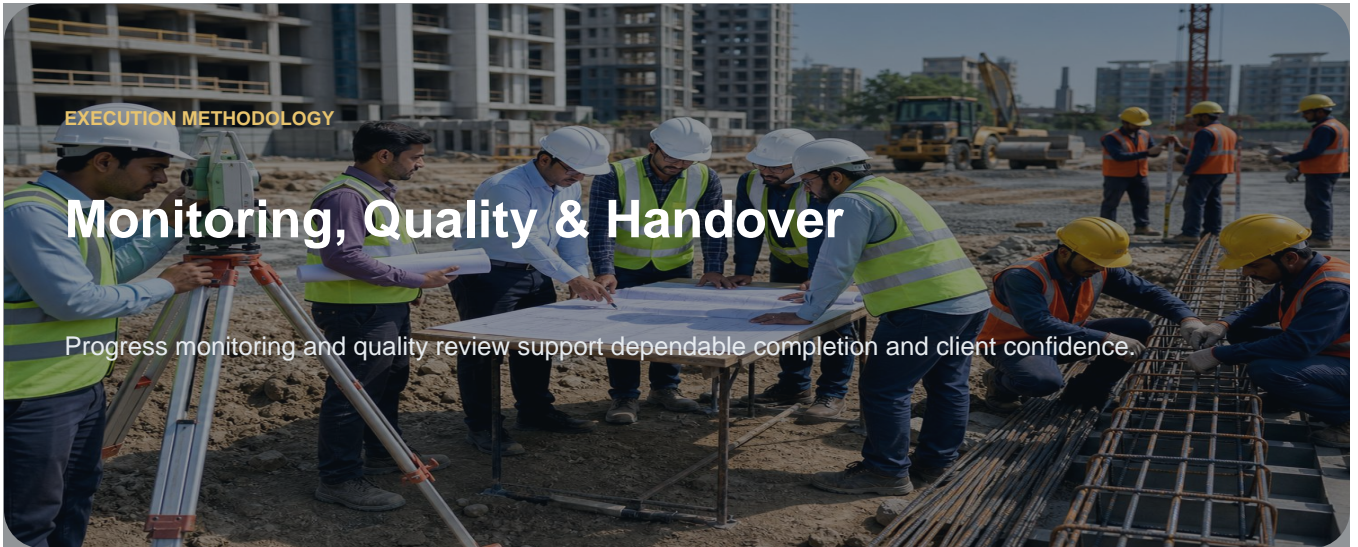

A clear work plan helps align materials, manpower, machinery and timeline expectations.

Planning & Coordination
A clear work plan helps align materials, manpower, machinery and timeline expectations.

Scope Highlights

- Scope planning
- Resource allocation
- Material coordination
- Manpower and machinery scheduling

Monitoring, Quality & Handover

Progress monitoring and quality review support dependable completion and client confidence.

Scope Highlights

- Site execution tracking
- Quality checks and safety review
- Measurement and documentation
- Completion, handover and support

MANPOWER & RESOURCES

Civil & Site Engineers

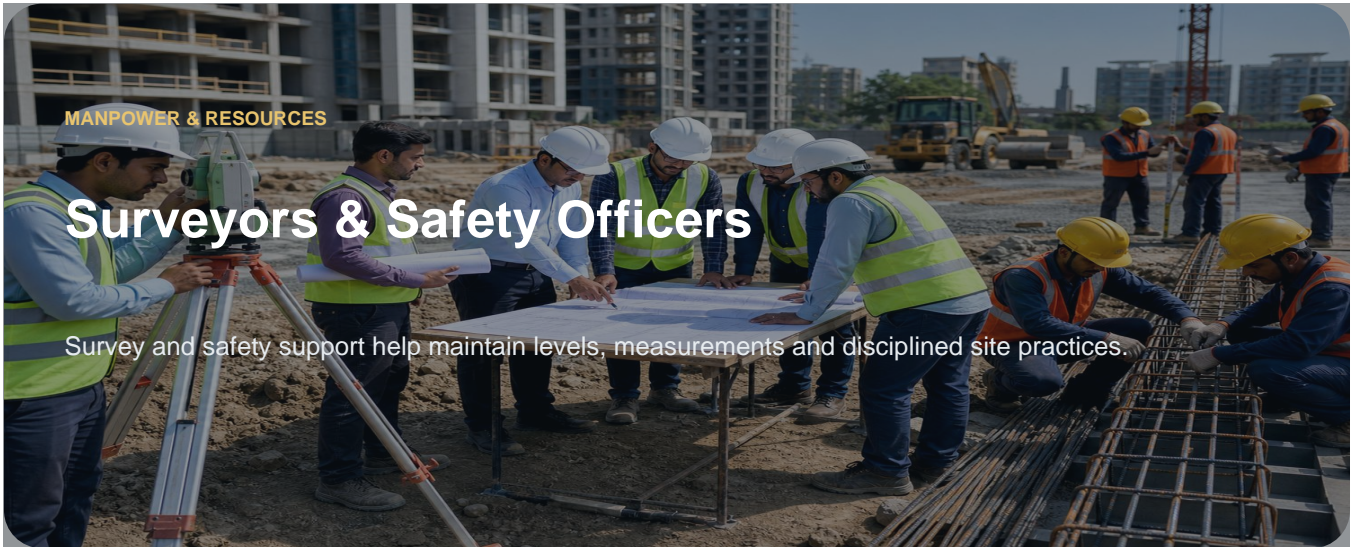

Engineering coordination supports practical work planning and supervised execution.

Civil & Site Engineers
Engineering coordination supports practical work planning and supervised execution.

Scope Highlights

- Civil engineers
- Site engineers
- Daily work coordination
- Site reporting support

Surveyors & Safety Officers

Survey and safety support help maintain levels, measurements and disciplined site practices.

Scope Highlights

- Surveyors
- Safety officers
- Measurement and layout support
- Risk awareness at active sites

MANPOWER & RESOURCES

Supervisors & Electrical Teams

Field supervision and electrical teams help maintain steady progress across work fronts.

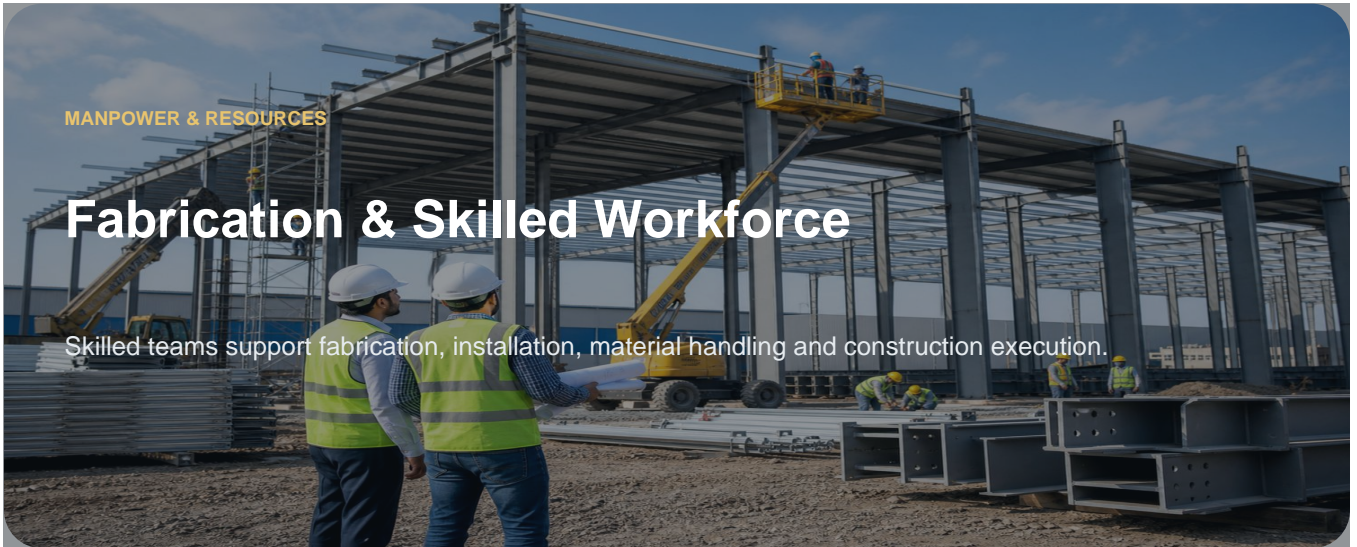

Supervisors & Electrical Teams

Field supervision and electrical teams help maintain steady progress across work fronts.

Scope Highlights

- Supervisors
- Electrical teams
- Lighting and cable work support
- Material and manpower coordination

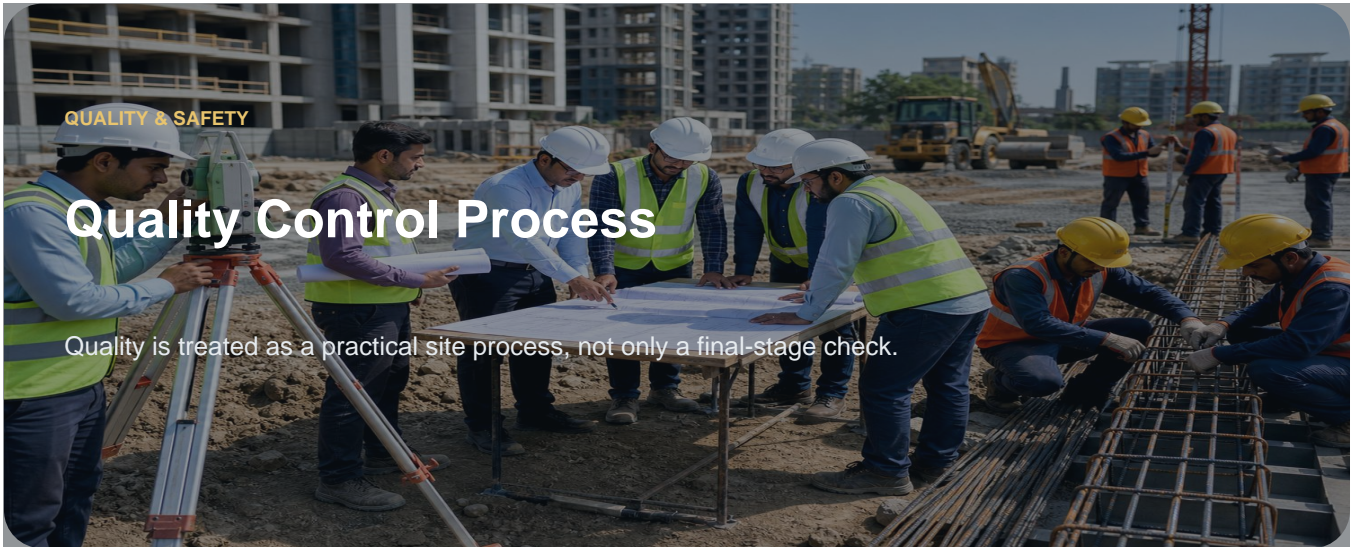

Fabrication & Skilled Workforce

Skilled teams support fabrication, installation, material handling and construction execution.

Scope Highlights

- Fabrication teams
- Skilled workforce
- Unskilled workforce
- Site-based work-front support

Quality Control Process

Quality is treated as a practical site process, not only a final-stage check.

Scope Highlights

- Material checks
- Workmanship review
- Process supervision
- Corrective action support

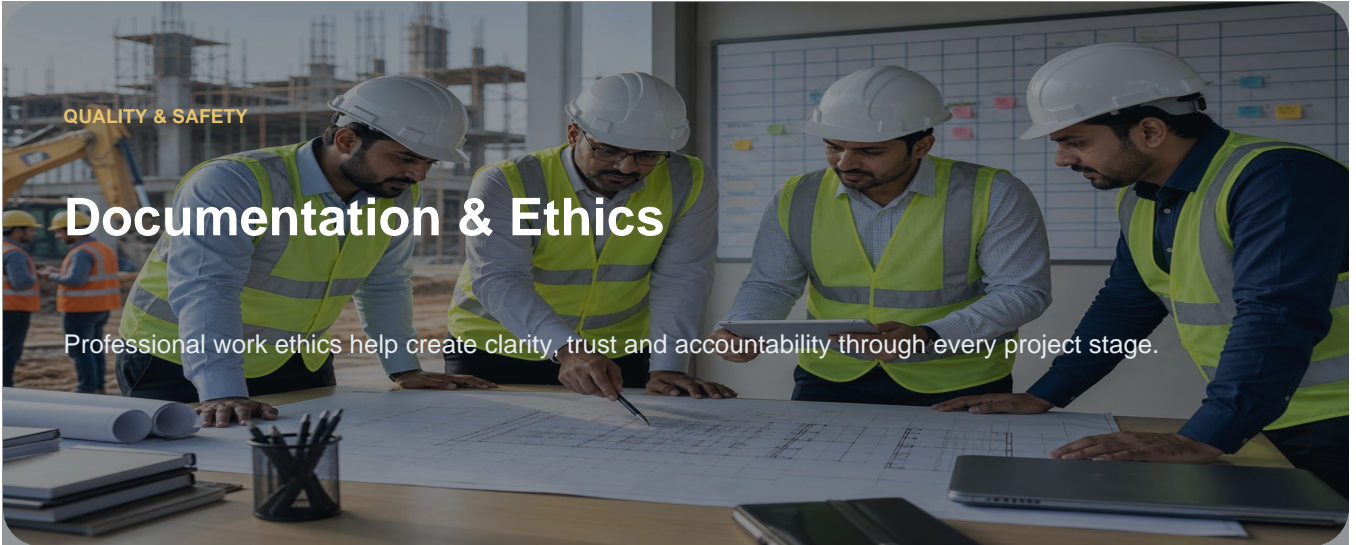

Testing & Reporting
Testing, measurement and reporting improve accountability on construction and utility projects.

Scope Highlights

- Material quality and testing support
- Inspection and measurement
- Supervised execution reporting
- Progress documentation

QUALITY & SAFETY

Documentation & Ethics

Professional work ethics help create clarity, trust and accountability through every project stage.

Documentation & Ethics

Professional work ethics help create clarity, trust and accountability through every project stage.

Scope Highlights

- Inspection documentation
- Transparent communication
- Responsible execution
- Client-focused accountability
